PROJECTS

1. A dynamic live weather

a dynamic live weather app developed using Vite + React, enhanced with the sleek Material UI design.

2. Groceries responsive websites.

This responsive website, meticulously crafted with HTML, CSS, and JS, promises a seamless browsing experience across all devices.

3. Simon Say Game

Using HTML, CSS, and JavaScript! Swipe through the classic fun of repeating patterns and challenge your memory.

4. Parallax effects on websites.

JavaScript property: `window.scrollY`. This property allows for dynamic and visually striking parallax effects on websites.

5. Responsive coffee website.

Crafted a sleek and responsive coffee website using HTML, CSS, and a touch of JavaScript for that extra flair.
